“At Bergamot, We dedicate our passion, expertise and talent to deliver solutions that safeguard people’s health and well being.”

- Chin Tze Kai,
Managing Director

Established in 2015, Bergamot has become a trusted name in medical consumables and personal protective equipment (PPE), delivering solutions that prioritize safety, reliability, and innovation. Bergamot’s mission goes beyond supplying products—we are committed to ensuring every interaction with our brand reflects care, quality, and trust.

With the belief - "Care In Every Touch" extends to every aspect of our work, we design and deliver products that empower professionals in healthcare, industrial, and pharmaceutical sectors. From anticipating market needs to ensuring precision in our offerings, we remain dedicated to protecting the well-being of our users and their environments.

Our robust and sustainable supply chain supports clients across Asia, Europe, North America, Oceania, and the Middle East, ensuring seamless access to solutions that align with the highest standards of performance and compliances. By combining innovation with care, today Bergamot stands as a trusted partner in health, safety, and progress.

At Bergamot, we don’t just deliver products; we deliver peace of mind—because every touch matters.

Care in Every Touch

"With every order we fulfil, and every customer we serve, Bergamot's promise of care continues to touch lives, one interaction at a time."

At Bergamot, "Care In Every Touch" is not just a statement—it's a commitment we renew every day. It reflects our dedication to creating meaningful connections with our customers and ensuring every product and service we deliver carries the highest standard of safety, reliability, and comfort.

In the world of healthcare, every touch matters. With Bergamot, you can trust that care is woven into every fiber.

The Bergamot Edge

At Bergamot, our well-established business model and clear strategy have driven robust growth both domestically and internationally. Through a combination of organic development and strategic acquisitions, we have positioned ourselves as a leader in the medical disposable and personal protective equipment industry.

What Sets Us Apart?

Manufacturing Excellence

We produce high-quality examination and protection gloves for various sectors, including medical, industrial, food, household, and beauty.

Global Sourcing

Partnering with multinational and local providers, our established connections and accessibility to ranges of quality products allow us to meet diverse client needs.

Streamlined Consolidation

By leveraging on our global presence and warehousing infrastructure, we optimize procurement and distribution, providing cost-effective solutions and reducing lead times.

Reliable Delivery

With three local branches and four overseas distribution centres, we ensure timely and flexible delivery options globally.

Expert Consulting

Our experienced team offers tailored products, solution, supply chain management and business consulting services to maximize efficiency and minimize hidden costs for our clients.

Why Choose Bergamot ?

- Trusted global brand recognized in over 50 countries.
- Wide range of medical disposable products catering to medical and industrial needs.
- Internationally certified product quality and compliance with up-to-date regulations.
- Marketing support with promotional materials and marketing kits.
- Expert business consultation and personalized customer service.
- Strategic partnerships and adaptive solutions for evolving markets.
- Products designed to thrive in a recession-proof, evergreen healthcare industry.
- A strong focus on client satisfaction and sustainable relationships.

By delivering high-quality products, personalized services, and comprehensive supply chain solutions, Bergamot remains committed to empowering businesses and individuals with innovative solutions in the healthcare and hygiene sectors. .

Healthcare PPE Market Trends & Key Drivers

The healthcare personal protective equipment (PPE) market is on a strong growth trajectory, driven by heightened awareness of infection control, technological advancements, and regulatory mandates.

Technological Advancements

Manufacturers are focusing on innovative solutions such as antimicrobial and self-disinfecting materials, breathable and durable designs, and smart PPE that can monitor wearer vitals or alert users to contamination risks. Sustainability is also a growing concern, with efforts to develop biodegradable and reusable PPE to reduce environmental impact.

Regulatory and Safety Standards

Regulatory bodies, such as OSHA in the U.S., have implemented stringent guidelines for worker safety, mandating the provision of PPE in healthcare and industrial sectors. These regulations, alongside global safety norms, have catalysed the adoption of advanced PPE products.

Rising Demand for Specific Products

Gloves and masks remain the most in-demand products in healthcare due to their critical role in infection prevention. Respiratory protective equipment, such as N95 masks, continues to see high demand due to its use in healthcare and industrial applications. By 2032, the respiratory protection market is expected to surpass \$16 billion.

Supply Chain and Sustainability

The COVID-19 pandemic exposed vulnerabilities in PPE supply chains, prompting governments and companies to enhance local production and stockpile essential items. Simultaneously, there is an increasing focus on reducing hospital waste through reusable and virus-resistant PPE designs.

Regional Insights

North America, driven by stringent regulations and government initiatives, remains a key market for healthcare PPE. Asia-Pacific is also witnessing significant growth due to expanding healthcare infrastructure and investments in worker safety.

Certifications & Standards

At Bergamot, we adhere to the highest industry standards to ensure quality, safety, and reliability in every product we deliver. Our certifications reflect our commitment to excellence and compliance, providing confidence to our customers worldwide.

Polyethylene Gloves

PE gloves and CPE gloves are disposable gloves made of a lightweight and affordable plastic material called polyethylene. They are commonly used in food handling, medical and industrial applications where a barrier between the hands and the environment is required to maintain hygiene and prevent contamination. These gloves are transparent, non-toxic, and have a loose-fitting design, making them comfortable to wear for extended periods of time.

100% Virgin Material refers to the highest standards that we are fulfilling and committing to our clients, especially since many of our products fall under the category of Personal Protective Equipment and come into close contact with human skin. To ensure maximum hygiene, all our products are made from 100% virgin materials that have not been previously used or recycled. Moreover, we take care to ensure that our workers do not come into direct contact with the raw materials during the packaging process to avoid any cross contamination.

Body Protection & Foot Protection

Body protection PPE (Personal Protective Equipment) refers to clothing or equipment designed to protect the wearer's body from injury or infection. In addition to these products, there is also a variety of other body protection PPE products, including aprons, boots, and respiratory protection equipment. When selecting body protection PPE, it is important to consider the specific hazards that workers will be exposed to, as well as the level of protection required.

HAND HYGIENE

Hand Sanitizer & Disinfectant Products

What is Hand Hygiene?

Hand hygiene is any action of hand cleansing, including:

- Washing hands with the use of a water and a soap or a soap solution, either non-antimicrobial or antimicrobial
- Applying a waterless antimicrobial hand rub to the surface of the hands (e.g. alcohol-based hand rub).

When performed correctly, hand hygiene results in a reduction of microorganisms on hands.

Why is Hand Hygiene so important in healthcare?

Effective Hand Hygiene is the single most important strategy in preventing healthcare associated infections.

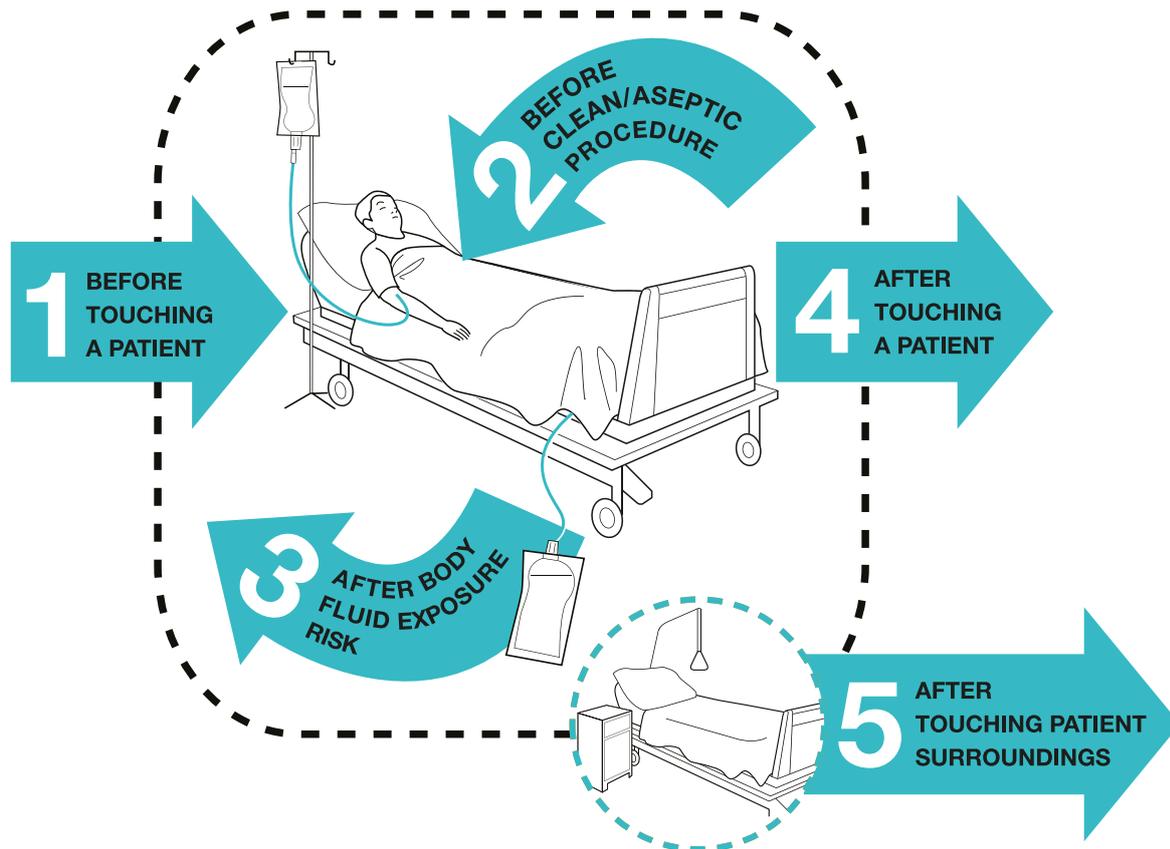

What are some of the reasons for poor Hand Hygiene among healthcare workers?

- Heavy workloads - the busier you are the less likely you are to wash your hands
- Time consuming - there just isn't enough time to wash your hands as often as you need to using the traditional Hand Hygiene techniques
- Hands don't appear dirty - Bugs are there even if you can't see them
- Problems with skin irritation - frequent washing with soap and water removes skin lipids, and in some cases, causing dryness, skin irritation and damaged skin
- Poorly located sinks - if it's hard to get to a sink you are less likely to use it.

Indications on how to perform Hand Hygiene?

- Use an alcohol based hand rub for all clinical situations where hands are visibly clean.
- Wash with soap and water when visibly dirty or contaminated with proteinaceous material, or visibly soiled with blood or other body fluids, or if exposure to potential spore forming organisms is strongly suspected or proven, or after using the bathroom.

Your 5 Moments for Hand Hygiene

1 BEFORE TOUCHING A PATIENT	WHEN? Clean your hands before touching a patient when approaching him/her. WHY? To protect the patient against harmful germs carried on your hands.
2 BEFORE CLEAN/ASEPTIC PROCEDURE	WHEN? Clean your hands immediately before performing a clean/aseptic procedure. WHY? To protect the patient against harmful germs, including the patient's own, from entering his/her body.
3 AFTER BODY FLUID EXPOSURE RISK	WHEN? Clean your hands immediately after an exposure risk to body fluids (and after glove removal). WHY? To protect yourself and the health-care environment from harmful patient germs.
4 AFTER TOUCHING A PATIENT	WHEN? Clean your hands after touching a patient and her/his immediate surroundings, when leaving the patient's side. WHY? To protect yourself and the health-care environment from harmful patient germs.
5 AFTER TOUCHING PATIENT SURROUNDINGS	WHEN? Clean your hands after touching any object or furniture in the patient's immediate surroundings, when leaving – even if the patient has not been touched. WHY? To protect yourself and the health-care environment from harmful patient germs.

IV Therapy & Hemodialysis Products

IV Therapy Consumable Products refer to a range of medical products that are used in intravenous therapy, a medical technique that involves administering fluids, medications, or nutrition directly into a patient's veins.

MEDTOPIA STERILE DISPOSABLE LUER LOCK SYRINGE

- Used in healthcare settings normally for the administration of medication
- Compatible with any standard hypodermic needles
- Sterilization method: ethylene oxide (ETO)
- High level sealing & smooth sliding

Products Code	Description	Size	Packaging
M0203-06	● Medtopia Sterile Disposable Syringes - Luer Lock	1ml	100pcs/box ; 32boxes/ctn
M0203-01	● Medtopia Sterile Disposable Syringes - Luer Lock	3ml	100pcs/box ; 30boxes/ctn
M0203-02	● Medtopia Sterile Disposable Syringes - Luer Lock	5ml	100pcs/box ; 24boxes/ctn
M0203-03	● Medtopia Sterile Disposable Syringes - Luer Lock	10ml	100pcs/box ; 16boxes/ctn
M0203-04	● Medtopia Sterile Disposable Syringes - Luer Lock	20ml	50pcs/box ; 16boxes/ctn

MEDTOPIA STERILE DISPOSABLE LUER SLIP SYRINGE

- Suitable for feeding purposes
- Compatible with any standard hypodermic needles
- Sterilization method: ethylene oxide (ETO)
- High level sealing & smooth sliding

Products Code	Description	Size	Packaging
M0206-06	● Medtopia Sterile Disposable Syringes - Luer Slip	1ml	100pcs/box ; 32boxes/ctn
M0206-01	● Medtopia Sterile Disposable Syringes - Luer Slip	3ml	100pcs/box ; 30boxes/ctn
M0206-02	● Medtopia Sterile Disposable Syringes - Luer Slip	5ml	100pcs/box ; 24boxes/ctn
M0206-03	● Medtopia Sterile Disposable Syringes - Luer Slip	10ml	100pcs/box ; 16boxes/ctn
M0206-04	● Medtopia Sterile Disposable Syringes - Luer Slip	20ml	50pcs/box ; 16boxes/ctn
M0206-05	● Medtopia Sterile Disposable Syringes - Luer Slip	60ml	25pcs/box ; 16boxes/ctn

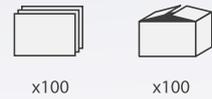

med+OPIA

MEDTOPIA HYPODERMIC NEEDLE

- Sterile device used with syringes to inject solutions into or withdraw secretions from the body
- Sterilization Method: ethylene oxide (ETO)
- Ultra sharp
- Smooth cannulation
- Individually packed

PACKAGING:

Products Code	Description	Size
M0204-01	● Medtopia Hypodermic Needle	18G x 1.5inch
M0204-02	● Medtopia Hypodermic Needle	21G x 1.5inch
M0204-03	● Medtopia Hypodermic Needle	23G x 1inch

M0203-40	● Medtopia Hypodermic Needle	30G x 0.5inch

med+OPIA

MEDTOPIA HEPARIN CAP

- Non-toxic
- Non-pyrogenic
- Sterilization method: ethylene oxide (ETO)
- Suitable to be used as catheter stopper (eg. IJC)

PACKAGING:

Products Code	Description	Size
M0202-05	Medtopia Heparine Cap	Free Size

med+OPIA

MEDTOPIA IV INFUSION DRIP SET (20 DRIPS)

- Disc filter in the drip chamber flow rate = 20 drops/ml
- Ultra sharp needle points and smooth sliding bring less pain to the patient
- Sterilization method: ethylene oxide (ETO)
- Flexible tubing with a standard length of 150cm
- Can be assembled with infusion bags and bottles

PACKAGING:

X25

x16

Products Code	Description	Needle Size	Tube Length
M0215	Medtopia IV Infusion Drip Set (20 Drips)	21Gx1 ½	150cm

VITAL[®]

VITAL BLOODLINE (3 in 1)

- Tubes are soft and flexible
- Convenient connection to fistula needle and dialyzer
- Sterilization method: ethylene oxide (ETO)
- IV set included

PACKAGING:

x24

Products Code	Description	Size
M0205-04	Vital Bloodline 3in1 - Medical grade PVC Tubing	6.3mm (pump size)

HEMODIALYSIS SYSTEM

DORA

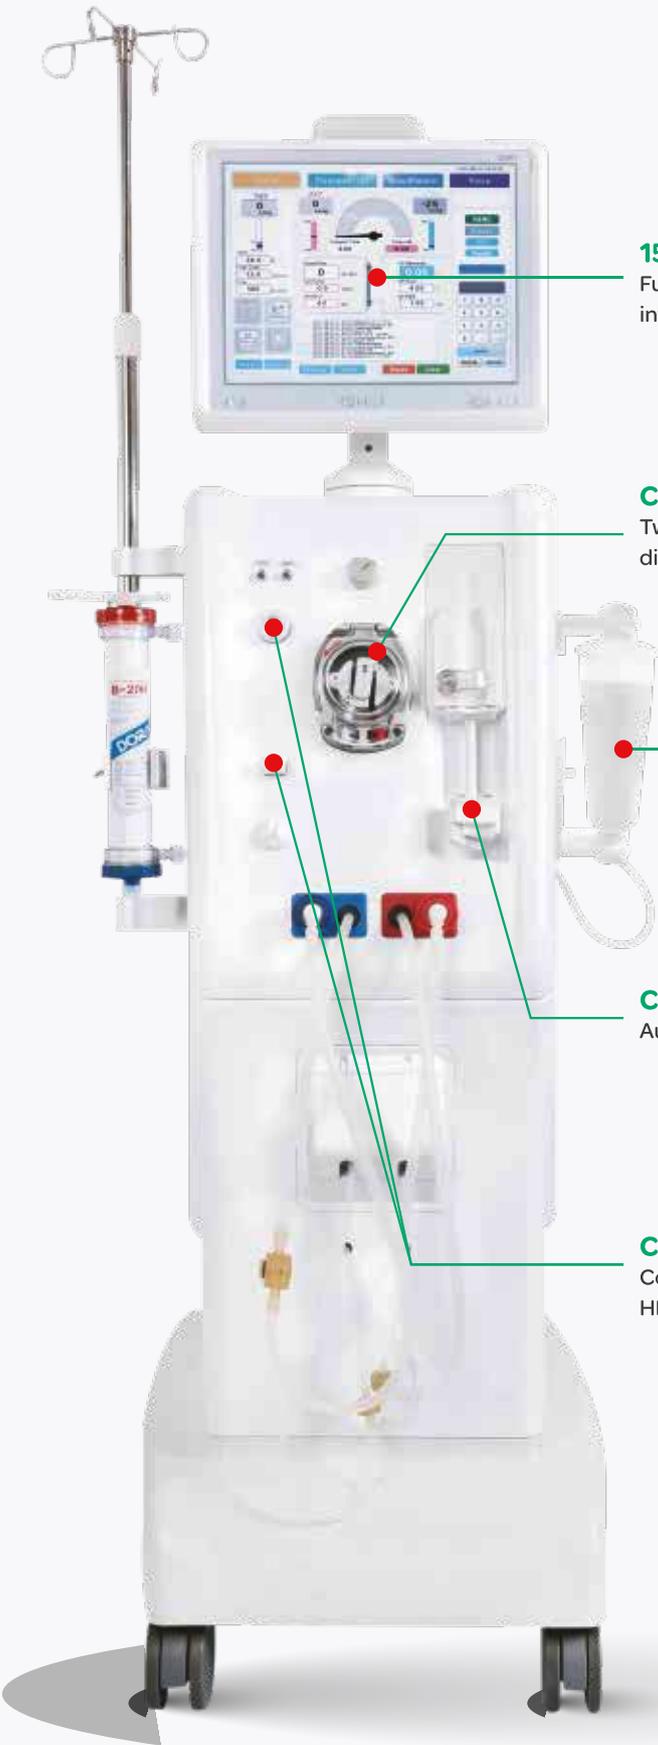

DORA-6000

Safety • Stability • Accuracy

Ultrapure • Ease of use

CE 1639

15-inch rotatable display

Fully rotatable screen allows ease in reading information from any direction

Convenient operation

Two methods of blood flow adjustment: digital button and physical knob

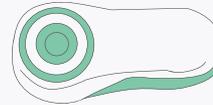

Bicarbonate Cartridge

Safe and efficient dispensing of bicarbonate

Convenient and Reliability

Automatic identification and monitoring

Compatibility

Compatible with multiple types of HD disposables

DORA-6000

Performance Parameter

General Data

Dimensions 1600 x 550 x 800mm (H x W x D)
Weight Approx. 83kg

Water supply
Water inlet pressure 1 - 3bar
Water inlet temperature 5 - 30°C

Power supply
Voltage 230V AC ± 10%
Frequency 50Hz
Max. consumption 2.1kVA

Extracorporeal circuit

Arterial pressure monitoring
Display range -400 ~ +400mmHg
Accuracy ± 10mmHg
Resolution 1mmHg

Venous pressure monitoring
Display range -100 ~ +400mmHg
Accuracy ± 10mmHg
Resolution 1mmHg

Transmembrane pressure monitoring
Display range -100 ~ +500mmHg
Accuracy ± 20mmHg
Resolution 1mmHg

Blood pump
Blood flow range 0,50 - 600ml/min
 0,30 - 360ml/min

Heparin pump
Delivery range: 0,0.3 - 10mL/h
Syringe size: 10, 20, 30mL

Air detector
Sensitivity Single bubble ≥ 20uL
 Continuous bubble
Accuracy ≥ 10uL

Hydraulic circuit

Dialysate flow range
Range 300 - 700ml/min

Dialysate temperature
Setting range 35 - 39°C

Dialysate conductivity
Display range 0 - 16.0mS/cm
Accuracy ± 0.1mS/cm

Ultrafiltration
UF rate 0 - 3600ml/h
Accuracy ± 1%

Blood leak detector
Sensitivity ≤ 0.35ml/min (HCT=32%)

Battery back up
 30mins' automatic power supply after power off

Disinfection method

Peracetic acid(recirculation)
 Hot citric acid(recirculation 85°C)
 Sodium hypochlorite(recirculation)
 Acetic acid(recirculation)
 Hot rinse(recirculation)

SAFETY

Protection System
Safety Self-testing
Electromagnetic Protection

- Featured with DLF+MON+UI triple safety protection system and dual interlock protection function of software & hardware to safeguard patient safety.
- Self-test during preparation, key components are automatically checked every 30 min during treatment.
- Compliance with international and EU standards, achieving high-level electromagnetic protection (Level 4)

- Precise measurement of dialysate, temperature and conductivity including Bicarbonate conductivity.
- Adequacy assured (Online clearance monitoring)
- Ceramic pump is utilized for accurate ultrafiltration control & automatic airtightness checking.

ACCURACY

Parameter Monitoring
Kt/V Monitoring
Ultrafiltration Control

EASE OF USE

Dialysate Formulation Preset
Drain Function
Maintenance

- User-definable dialysate temperature & conductivity and with multiple dialysate formulations available to deliver personalized treatment.
- Automatically remove liquid from dialyzer and blood tubing after treatment.
- Compact design to reduce malfunction and economize maintenance time.

- With the use of endotoxin filter, to achieve maximum reduction of microorganism and impurities from dialysate
- Eliminates contamination risks during the mixing of bicarbonate and concentration A
- 4 disinfectant modes for different demands. Disinfectant is monitored to prevent air drawing.

ULTRAPURE

Endotoxin Filter
Bicarbonate Cartridge
Disinfection System

STABILITY

Optimized Design
and Components

- Developed by experienced R&D team to ensure reliable treatment .
- Key components from world-leading suppliers.

OUR PRESENCE

Wound Care Products

Wound care products are medical supplies and materials used for the treatment and management of various types of wounds, including acute and chronic wounds, burns, surgical incisions, and other skin injuries.

MEDTOPIA STERILE GAUZE

- Used to stop bleeding and keep wounds clean from contamination
- Easy opening thumb mark on every pocket
- Special sealing of double-sided adhesive tape
- Folded type and without X-ray line
- Sterilization method: ethylene oxide (ETO)

PACKAGING:

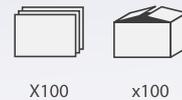

Products Code	Description	Size
M0105-04	Medtopia Sterile Gauze- 8ply, Mesh Count: 19x15	7.5cm x 7.5cm

MEDTOPIA NON STERILE GAUZE SWAB

- 100% Cotton providing high absorbency
- Ideal for wound dressing or absorbing fluid
- 8 Ply thickness in various sizes
- Reduce fraying and linting

PACKAGING:

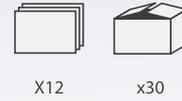

Products Code	Description	Size
M0105-06	Medtopia Gauze Swab- 8ply, Mesh Count: 19x15	5cm x 5cm
M0105-07	Medtopia Gauze Swab- 8ply, Mesh Count: 19x15	7.5cm x 7.5cm
M0105-08	Medtopia Gauze Swab- 8ply, Mesh Count: 19x15	10cm x 10cm

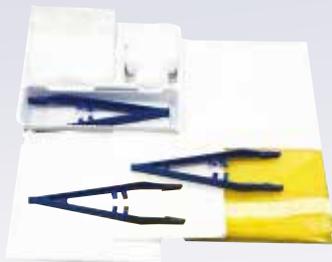

MEDTOPIA SURGICAL TAPE (MICROPORE)

- Wave-coated design
- Ideal amount of adhesive
- User- friendly paper type tape
- Lightweight & hypoallergenic

PACKAGING:

Products Code	Description	Size
M0103-02	Medtopia Surgical Tape	1" x 10 yards
M0103-03	Medtopia Surgical Tape – with dispenser	1" x 10 yards

STERILE DRESSING SETS

- Used to clean wounds and injuries to promote healing and prevent infection
- The components are often pre-packaged and arranged in a convenient manner
- Sterilization method: ethylene oxide (ETO)
- Consist of usable forceps with center lock and are made of hard material

PACKAGING:

Products Code	Description
M0107-01	Sterile Dressing Sets (Red)- w/o Forceps, Cotton ball (6pcs), Gauze Swab (6pcs)
M0107-02	Sterile Dressing Sets (Green)- 1 Forceps, Cotton ball (6pcs), Gauze Swab (6pcs)
M0107-03	Sterile Dressing Sets (Orange)- 2 Forceps, Cotton ball (5pcs), Gauze Swab (4pcs)
M0107-04	Sterile Dressing Sets (Purple)- 3 Forceps, Cotton ball (6pcs), Gauze Swab (4pcs)

Components

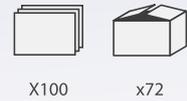

- 3 Compartment tray (1unit)
- Yellow Limpet bag (1bag)
- Hand Towel (1pcs)
- Patient drape (1pcs)
- Sterile drape (1pcs)

NON-STERILE COTTON BALL

- 100% pure cotton
- Soft and absorbent type
- Suitable for general wound cleaning and manicure clean up

PACKAGING:

X100

x72

Products Code	Description	Size
M0106-02	Non Sterile Cotton Ball	0.5gsm

INTERFOLD HAND TOWEL

- Uniquely embossed surface
- High absorbency
- Suitable for quick hand drying
- Commonly used in hospitals, clinics, education establishments, leisure, washrooms, and others.

PACKAGING:

OUR PRESENCE

FIRST AID KITS

First aid kits are essential medical kits that contain a variety of supplies and equipment for providing immediate medical care and treatment to individuals who have been injured or are experiencing a medical emergency. First aid kits come in a variety of sizes and types, from small, portable kits that are designed for use during outdoor activities or travel, to larger, more comprehensive kits that are suitable for use in workplaces, schools, and other public settings.
