

PROSORB

5 PLY UNDERPAD

Hypoallergenic

Highly Absorbent

WaterProof
Film Layer

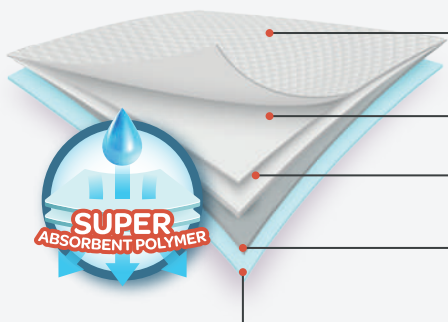

3D Diamond
Textured

Product Info

ProSorb 5 Ply Underpad is designed to protect the skin of incontinent patients. This highly absorbent, non-woven pad effectively absorbs moisture while being hypoallergenic. It features a waterproof film layer for maximum security, preventing liquids from seeping through linens or chairs. The 3D diamond texture on the top layer distributes liquids evenly, minimizing skin contact with moisture to keep the skin consistently dry. ProSorb 5 Ply underpad includes Super Absorbent Polymer (SAP) features that can absorb and retain large volumes of liquid, effectively preventing leaks. Enjoy all the features of Ecosorb plus enhanced absorbency with ProSorb. It is ideal for incontinence care, surface protection, and other situations where utmost protection is required.

5 Layer Anti-Leak Technology

1. Non woven Fabric

Soft and breathable, providing a gentle surface for enhanced comfort.

2. Tissue Paper

Offers quick absorption and helps distribute liquid evenly.

3. Fluff Pulp

Provides superior absorbency, efficiently locking in moisture and reducing the risk of leakage.

4. Super Absorbent Polymer

SAP layer absorbs and retains liquid, prevents leaks, ensures comfort, and promotes hygiene.

5. Leakproof PE Film

Waterproof and leak-proof, ensuring the underlying surfaces stay dry and protected.
